

ORGANIMAX PREMIUM COMPOST

See back page

Re-Energizes Garden And Potting Soils

Adds Life to Tired Soils Holds Moisture & Retains Nutrients

One cubic foot bag makes 4 cubic feet of compost enriched soil

ORGANIMAX is tested and certified by The US Composting Council.

ORGANIMAX is a unique combination of composted leaf yard waste

ORGANIMAX contains the following ingredients:

Mycorrhiza (endo & ecto) --- humic acid --- kelp meal --- micronutrients --- microbial food package, dextrose and sucrose ---- natural silica---vitamin blend ---23 species of beneficial microbes----- amino acids ---slow release natural based fertilizer

Coverage

Apply 1/2" to 3/4" over the top on turf or ornamental beds.

At 1 inch depth one bag will cover 12 square feet. (2 feet X 6 feet)

At 1/2 inch depth one bag will cover 24 square feet. (6 feet X 4 feet)

Application rates: soil mix, or rejuvenating potting mix:

Mix **Organimax** at 1 cubic foot **Organimax** per 3 cubic feet of soil.

For existing flower vegetable plots, use coverage recommendations, and incorporate into the soil to a maximum depth of 2 inches for maximum results.

For tree and shrub planting pits incorporate 50% **Organimax** planting compost to 50% existing soil to improve soil structure, fertility, and bio diversity.
